HIGHLIGHTS OF ORLANDO, FL NATIONAL COMPENSATION SURVEY JULY 2000

Workers in the Orlando, Florida metropolitan area averaged \$13.29 per hour during July 2000, according to a new survey released by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Regional Commissioner Janet S. Rankin reported that white-collar employees averaged \$16.49 per hour and accounted for 49 percent of the workers in the area. Blue-collar workers averaged \$12.39 per hour and represented 22 percent of the workforce, while the remainder worked in service occupations and earned \$8.18 per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal Government. This NCS covered 151 firms representing 382,400 workers in the Orlando metropolitan area, which includes Lake, Orange, Osceola, and Seminole Counties in Florida. Eighty-four percent of those represented worked in private industry.

In the Orlando metropolitan area, average hourly wages were published for more than 50 detailed occupations. (See table 1.) Among white-collar workers, registered nurses averaged \$20.94 per hour; secretaries, \$11.88; and cashiers, \$6.95. Blue-collar occupations included electricians earning \$15.29 per hour, construction laborers at \$9.37, and laundering and dry cleaning machine operators at \$6.61. In the service occupations, correctional institution officers averaged \$14.25 per hour; cooks, \$9.59; and nursing aides, orderlies and attendants, \$8.29.

The NCS also provides broad coverage of selected occupational characteristics. (See tables 2 and 3.) For example, full-time employees in the Orlando area averaged \$14.12 per hour and part-timers earned \$7.35. Union workers averaged \$13.83 per hour, while their nonunion counterparts made \$13.17. Private industry workers at establishments employing 50-99 workers averaged \$12.38 per hour and those in establishments with 500 or more employees earned \$13.02.

The NCS is part of a statistical program that will eventually integrate three separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. Average rates of pay are also available for levels of work within an

occupation based on knowledge, skill, independent judgement, supervision received, and other factors required on the job.

Survey Availability

Complete survey results are contained in the <u>Orlando, FL National Compensation Survey July 2000</u>, (Bulletin 3105-36). While supplies last, single copies of the bulletin are available from the Atlanta Information Office by calling 404-331-3415. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at http://www.bls.gov/comhome.htm. Select survey tables can also be obtained from the Bureau's fax-on-demand service in Atlanta by dialing 404-331-3403 and requesting document 9530.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the Atlanta Information Office at 404-331-3415 from 9:30 a.m. to 3:30 p.m. Eastern Time.

information.

3 Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

4 Union workers are those whose wages are determined through

collective bargaining.

 $^{^{\}mbox{\scriptsize 5}}$ Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production

bonuses.

6 The relative standard error (RSE) is the standard error expressed as a calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. IN THIS SURVEY, THE NONRE-SPONSE RATE FOR ALL INDUSTRIES, PRIVATE INDUSTRY, AND STATE AND LOCAL GOVERNMENT EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MINIO. IN MIND.

holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B for more information.

Sestablishments classified with 50-99 workers may contain establishments with fewer than 50 due to staff reductions between survey sampling and collection.

 $^{^4\,}$ The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix A.
